

Illustrated Index

Clean all parts thoroughly in solvent and dry with compressed air.

 Lubricate all parts with oil before reassembly.

NOTE:

- This transmission uses no gaskets between the major housings; use liquid gasket (P/N 08718—0001). If 20 minutes have passed after applying liquid gasket, reapply it and assemble the housings and allow it to cure at least 30 minutes after assembly before filling the transmission with oil.
- Always clean the magnet (24) whenever the transmission housing is disassembled.
